

## Clark Forklift Parts

Clark Forklift Part - At present, there are at least 350,000 Clark forklifts performing worldwide, and more than 250,000 operating in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, duel fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 particular parts designed for 20 distinctive designs of forklifts and automated equipment. Your local Clark Supplier is your complete source for availability of all your components needs provided by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently situated in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to provide the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to improving output and benefiting performance.

Clark Totalift has a very impressive intercontinental support network. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

Clark proudly remains an progressive leader of the material handling industry, pioneering protection features such as the worker restraint system. This exceptional commitment to safety is currently a customary feature on every lift truck.

Clark's relentless goal to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the globe to be certified with the globally accepted quality standard ISO 9001 for each and every one of their manufacturing plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental restrictions, thus placing them in a prevailing market position.

Clark has selected the structure of "Lean Production" at all of its assembly plants for the reason that this method is extremely economical and permits minimal use of resources. Established to guarantee maximum efficiency, this system is designed to discover and acknowledge the most effective methods for production facility management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working in concert, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing expenses. The new value engineering agenda combines progressive product growth and offers improved consumer support and service within the industry.
