

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an intercontinental company consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Equipment and Machine Instruments and Mechanization Systems.

Their United States affiliate, Doosan Infracore America Corporation, stationed in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Phoenix houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction client requirements.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. Moreover, there are more than 90 independent sellers moving forklift equipment and materials handling equipment. This system permits Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line impressively features 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various truck designs vary from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing lift truck business in the North American market, thanks to their reliability in retaining a high degree of customer service excellence and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division stationed in Cleveland has a professional team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

Originally the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a home-based machinery expansion venture. Sales of these products were originally targeted to state-run corporations, large scale corporations, and the armed forces. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction became the new focus for improving quality and product development.

Daewoo began the first domestic lift truck business in 1967, and quickly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a situation of significant growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the very competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company completed construction of a new facility to help in producing high end value-added goods for export. In 1993, the company had a global sales network and started exporting versions they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international marketplaces.
